

JUAN MIGUEL REPAS

Web Developer | AI Solutions | Cybersecurity | Quezon City, Philippines | 0994 778 5117 |
repasjuanmiguel@gmail.com

SUMMARY

Adaptable and results-driven Junior Web Developer with a focus on AI-assisted workflows and cybersecurity principles. Experienced in building functional, responsive web applications while streamlining processes through automation. Committed to delivering secure, user-centric digital solutions and eager to apply technical skills in a collaborative team environment.

PROFESSIONAL EXPERIENCE

Internship | DICT CYBERSECURITY | Quezon City

Feb 2026 - Present

- Assisted in monitoring network traffic and identifying potential security threats/anomalies.
- Performed vulnerability assessments on web assets and documented remediation steps.
- Supported the security team in policy enforcement and user access management.
- Gained hands-on experience with security incident response procedures and threat intelligence tools.

Freelance Web & Digital Solutions Specialist Various Projects

May 2025 - Present

Selected Project Experience

- HR Management System:** Architected a custom portal using React, Node.js, and PostgreSQL to manage employee records, leave requests, and real-time attendance via secure, role-based access.
- Urban Jungle Gym POS:** Engineered a JavaScript and Firebase-based POS system to streamline membership management, class bookings, and automated payment notifications.
- MOTOPH Motor Service:** Led end-to-end development using WordPress, PHP, and CSS; optimized site performance by 40% and improved navigation for a seamless user experience.
- SoulStyle E-Commerce:** Utilized Shopify/Liquid and Figma to design a high-conversion storefront, refining the checkout funnel and product display structures.
- Digital Operations & Automation:** Deployed Python and API-based workflows (Google Workspace/Notion) to automate file organization and reporting, reducing manual data entry by 60%.

EDUCATION

June 2024 - Present

Quezon City University

Bachelor of Science in Information Technology

Relevant Coursework: Web Development, Database Management, Data Structures & Algorithms, Network Security, and Systems Analysis.

ADDITIONAL INFORMATION

- Web Development:** React, Node.js, JavaScript (ES6+), PHP, HTML5/CSS3, Shopify/Liquid, WordPress.
- AI & Automation:** Proficient in AI-Assisted Development using Claude, Gemini, ChatGPT, Cursor, and Lovable for code generation, debugging, and workflow optimization.
- Cybersecurity:** Security Fundamentals, Vulnerability Assessment, Network Security, Secure Coding Practices.
- Data & Database:** PostgreSQL, Firebase, Data Management, API Integration (Notion, Google Workspace).
- Design & Tools:** Figma, Adobe Creative Suite, Git/GitHub, Responsive Design, UI/UX Principles.
